ANNUAL REPORT 2021

MEMORIAL HERMANN°

21 Years of Fighting Cancer

Cancer is the leading cause of premature death in the U.S. working-age population (ages 20-65 years). Almost 1 in 5 cancers is caused by excess body weight, alcohol consumption, poor diet, and a sedentary lifestyle. Prevention and early detection are key. The American Cancer Society recommends:

- 1. Tobacco prevention and cessation
- 2. Eliminating or limiting alcohol consumption
- 3. A healthy, balanced diet
- 4. Regular physical activity
- 5. Physical activity and cancer screening and prevention

A Cancelled Event Didn't Stop the Cause

Our In the Pink of Health committee was more committed than ever to have a live event in 2021 after having a virtual event in 2020, where In the Pink of Health supporters joined in "A Porch Affair" to celebrate safely in their homes. Fast forward to 2021, and due to the outbreak of the COVID-19 delta variant, the In the Pink of Health luncheon and Premier Party were cancelled in late September 2021. As a result, In the Pink of Health leadership sprung into action contacting sponsors to inform them of the decision and asking for their continued support. The response was a resounding "yes" and because of the generosity of our sponsors, In the Pink of Health was able to distribute \$500,000 in January 2022 to our charity partners.

In its 21-year history, In the Pink of Health has invested \$7.6 million into our community. Funds support state of the art technology at the Memorial Hermann Breast Care Center, prevention initiatives, community outreach and education, free mammograms for underserved women and ongoing generous support to the Canopy Cancer Survivorship Center at Memorial Hermann The Woodlands Medical Center campus.

Mission Statement

Memorial Hermann In the Pink of Health is a group of inspired women who change lives by raising funds to reduce the incidence of breast and ovarian cancer, and to assist survivors in their journeys.

> In 2022, there will be **1.9 million** new cancer cases

> > 609,360 deaths

1,670 deaths per day

19,880 new diagnosed cases of ovarian cancer, of which

12,550 patients will not survive

Ovarian cancer is the fifth-leading cause of

cancer deaths in women.

In 2022, there will be

290,560 new cases of breast cancer:

> 287,850 new cases in women

2,710 new cases in men

lin 8 women will be diagnosed with breast cancer
