

As a patient at Memorial Hermann Memorial City's original facility, I remember it as a place where the healthcare was outstanding but the patient experience could be improved.

Today, the Center is a state-of-the-art screening and diagnostic facility, and has transformed what is an uncomfortable experience into a more spa-like experience with warm, fluffy robes, a coffee bar and a relaxing atmosphere. I still receive notes from women saying how much they appreciate its cozy touches. It's exactly as I envisioned it.

LIFE-SAVING PRECAUTIONS

When caught early, breast cancer may be easier to treat, which is why Memorial Hermann recommends yearly screening mammograms beginning at age 40. Memorial Hermann provides personalized breast cancer treatment plans to meet the individual needs of each patient. Treatment options such as surgery, chemotherapy, radiation therapy and immunotherapy may be recommended.

HOW TO MAKE AN APPOINTMENT

Bobetta Lindig Breast Care Center
Memorial Hermann Memorial City Medical Center
Medical Plaza 4 – 925 Gessner, Suite 300, Houston, Texas 77024

To schedule a mammogram at the

BREAST CARE
REIMAGINED

When you walk through the doors of the Bobetta Lindig Breast Care Center, you immediately feel a sense of tranquility. This 7,500-square-foot screening and diagnostic facility is exactly what Bobetta Lindig envisioned when she offered her generous support to make it happen.

Comfortable Waiting Area	Cozy Lighting
Warm Fluffy Robes	A Bubbling Fountain
Private Lockers	Flavored Coffee and Herbal Tea

Women anxious about their exams are welcomed into this calm and supportive environment. Patients, referred to as guests, receive personal attention in a spa-like setting.

The technology is just as impressive as the interior. The Center's 3-D breast tomosynthesis imaging system can detect tumors the size of a grain of rice. If needed, the patients can plan and take their next steps with an oncology nurse navigator by their side.

A CAUSE
TO SUPPORT

In a world where one in eight women will develop breast cancer in her lifetime, timely diagnosis is critical. The Breast Care Center's highly skilled staff and state-of-the-art technology enable the detection of the most minute abnormalities ensuring the best possible outcomes.

Trained Breast Radiologist	3-D Mammograms	Breast Needle Localizations
Image-Guided Breast Biopsies	DEXA Scan (Bone Density Screening)	Breast Ultrasound
Screening Mammograms	Breast Ductograms	A Full-Time Oncology Nurse Navigator
Diagnostic Mammograms	Breast MRI	Support Groups
