Memorial Hermann's Pancreatic Cancer Support Group aims to provide a safe and supportive environment for individuals diagnosed with pancreatic cancer, survivors, caregivers and family members. The group focuses on offering emotional support, sharing information, providing resources and empowering participants through education about managing the disease. The goal is to reduce feelings of isolation, improve coping strategies and enhance the overall quality of life for those affected by pancreatic cancer.

The support group will address a variety of topics every month, including managing symptoms and side effects, nutrition and diet for pancreatic cancer patients, survivorship and life after cancer, and much more!
